

ROBOT SOCCER WORLD CUP

.....

ROBOCUP 2006

BREMEN · GERMANY

13 - 19 JUNE 2006

WWW.ROBOCUP2006.ORG

VENUE

RoboCup community is going to celebrate its 10th anniversary in Bremen, Germany, 2006. The competition venue is located at the Bremen Fair Center where hall 5 (10.300 m²) and hall 6 (4.800 m²) with a total area of 15.100 m² are proposed. The Symposium will take place at the Congress Center offering direct access to the competition halls (www.messe-bremen.de).

DATE

RoboCup 2006 is scheduled from 13-19th June 2006 and thus overlaps with the round robins of the FIFA World Cup 2006 in Germany. Furthermore, ACTUATOR 2006, an international scientific conference with accompanying exhibition, will take place at the same time at the Fair and Congress Center Bremen. ACTUATOR is the world's leading event in the sector of new actuators and miniaturized electromagnetic drives, being key hardware components of the competing robots. Therefore, we are convinced that both events are of mutual interest to their participants.

EXHIBITION

We intend to have an industrial exhibition simultaneously with the RoboCup competitions. Therefore, we invite exhibitors in the field of robotics as well as related areas to a joint exhibition. The city of Bremen is currently discussing the long-term support for activities in the robotics sector. We are convinced that the participants of RoboCup and ACTUATOR as well as the expected 20.000 to 40.000 visitors of the contests are an audience valuable to address to. Furthermore, a special exhibition "10 Years RoboCup" is planned, where we would like to show the development of the RoboCup technologies over the years.

BREMEN

Bremen is the smallest state of the Federal Republic of Germany with 530.000 inhabitants in Bremen and 130.000 in Bremerhaven. Thus, it is an important mega-center in the northwest German region along the river Weser.

The Hanseatic City of Bremen has many facets - history, tradition, high tech, science and aerospace are united here to form a vibrant and innovative environment. It is a city with very special charm, both cosmopolitan and historical, with a lot of green in between.

TRAVEL

Bremen is particularly distinguished as a city of short distances; everything is within easy reach. The modern Bremen International Airport is located next to the city and may be reached from the Fair and Congress Center in 15 min by taxi and 20 min by public ground transport.

The Bremen Railway Station is located just opposite to the Fair and Congress Center (3 min walk) and also in walking distance from the city center. The Intercity (IC), InterCityExpress (ICE) and EuroCity (EC) links the Bremen railway station with all major cities in Germany within a minimum of travel time.
